MYSTERY BACCARAT
JACKPOT

The GES Mystery Baccarat Jackpot System can be installed on your existing display hardware – no additional equipment is required.

Players like BIG JACKPOTS - $1,000,000 – Major Win!

Players like FREQUENT JACKPOTS - $20,000 Regular Wins!

But how do you make a jackpot work on a Baccarat game?

The 3 key ingredients:-
1.   HOUSE FUNDING
2.   MYSTERY JACKPOTS
3.   TABLE BASED CONTRIBUTIONS

MYSTERY BACCARAT
JACKPOT

MYSTERY JACKPOT
SUMMARY

- GES table-based Mystery progressive is an end-to-end solution only requiring connection with a smart Baccarat shoe.

- No additional hardware required – GES Baccarat display and jackpot odometer software can be installed on existing display hardware (in most cases).

- Mystery jackpots increase player visitation, time at table and turnover + increased win.

- Table based contributions encourage an increase in hand participation.

- Mystery Jackpots offer high visibility marketing opportunities and competitive advantage.

MULTIBET SYSTEM

A NEW WAY TO PLAY
LIVE GAMES

MULTI-BET TERMINAL

- The MultiBet Terminal includes a main touch screen, top animation screen, bill acceptor, ticket printer and barcode scanner

- A play session starts when cash is inserted into the bill acceptor, or a winning ticket is scanned via the barcode scanner, or a cash ticket is inserted (having being previously printed after a player has cashed out)

- Cash or winnings are transferred to the credit meter

- If a player does not use all their credit to place bets, then they can cash out and receive a cash ticket for any unused credit

- SAS Ticketing integration allows Casino host system to manage cash tickets

MULTIBET HOME SCREEN

- The home screen allows players to select between Roulette and Baccarat Games.

- There are currently 6 Roulette Games and 1 Baccarat Game.

- Credit is shown on the bottom right-hand corner.

- Players can cash out at any time as long as a bet is not in the process of being placed.

MULTIBET ROULETTE GAMES - STRAIGHT UP

- Players select numbers they wish to bet on. Each number selected pays 35 -1 straight up odds

- Choose how much to bet per spin, how many numbers to select and how many spins to play

- If a player selects one number at $10 per spin then that number is a $10 bet to win. If a player selects 10 numbers at $10 per spin then each number is a $1 bet to win.

- The total bet is the amount bet per spin multiplied by the number of spins

MULTIBET ROULETTE GAMES – HIGH LOW

- Select a number and opt for HIGH or LOW.

- Choose how much to bet per game and the number of spins.

- In this example the bet wins if, during the next 10 spins after activation, ALL the spin results are higher than 10.

- The pay-table is dynamic and changes dependent on the number selected, the HIGH / LOW option and the number of spins chosen. The house edge is defined by the operator.

MULTIBET BACCARAT GAMES – DRAGON TAIL

- Select streaks of PLAYER or BANKER or both. A streak is three or more results in a row.

- Players can select "ANY" which pays out from 3 results in a row up to 8 results in a row.

- Players can select a specific streak length which wins only if the specific streak length occurs.

- Players can select the number of coups for a streak to occur. If a streak is established on the last coup – then the bet is still active until the streak ends.

- Players can bet on both Player and Banker streaks on the same ticket! The house is defined by the operator.

LUCKY TIE

Lucky Tie is a house funded jackpot where players have the chance of winning a progressive jackpot prize when placing a normal tie bet. The jackpot triggers when an 88 – 88 tie occurs. All players who placed a tie bet for that round share the jackpot prize in proportion to the total amount of units bet. The jackpot can be either incremented by a fixed contribution per round or time based.

INSTALLATION

GES POKER MANAGEMNT SYSTEM OVERVIEW

Jackpot, Waitlist and Tournament System designed specifically for Poker Rooms.

• Uses wireless and web-based technology.

• Table hardware comprises standard Android or iOS devices in specialised protective casings.

• Operators can define their own Jackpot prize structures – for example, Bad Beat, Royal Flush, or both.

• Jackpot contributions can either be funded from the rake fee or via a player side bet.

• Sessional High Hand bonus prizes.

• Register on to Waitlist via SMS.

• Optional Self Registration touchscreen kiosk.

• Certified by BMM Test Labs in multiple jurisdictions throughout Australia and Asia.

FEATURES AND BENEFITS

FEATURE	BENEFIT
Powerful and flexible progressive jackpot and bonus system.	Jackpots and bonuses drive player attendance and reward existing player loyalty.
Fully managed cash game waitlist.	Minimises empty seats at tables.
Integrated tournament management.	Handling restrictions, seating and countdown timer; reducing labour costs.
Wireless technology.	No need to install data cable in poker room – highly flexible.
Small format Android or iOS table hardware.	Reduces table clutter, easy to install and maintain.
Uses web-based technologies.	Allows operators to use existing hardware to manage the system and existing TVs and LCD screens to show jackpot displays.
Low-cost system using latest generation technologies.	Poker rooms need to connect every table – makes the product cost feasible.
Fully automated real time live system with full auditing.	Player and regulator assurance – automates manual processes and reduce staff costs.

BLACKJACK PAYS 6 TO 5
SEATING FOR PLAYERS ONLY

777♦ WINS THE M

Blackjack Bonus™ is a house funded Progressive Jackpot which incentivises play and increases turnover.

The jackpot is time based adding a fixed contribution to the Jackpot Odometer per open table per minute of play.

The jackpot is won when a player is dealt a specific hand e.g. 7D 7D matching 7D Dealer's up card.

Other winning variants are possible including multi-level jackpots.

House funded jackpots are incremented without players having to make a separate wager. The house covers the contribution to the jackpots and recoups the revenue from the following: -

- Increased bet turnover, more players, increased time at the table and increased spend.

- Increased house edge by offering small variations to the game rules such as a 6 to 5 BJ payout.

BLACKJACK BONUS™ -
OPERATIONAL OVERVIEW

- Easy hardware – install GES Blackjack Bonus™ wireless odometer displays on each participating table.

- Option to utilize existing table displays.

- No changes required to base game operating procedures except processing jackpot wins.

- All jackpot management functionality available via the jackpot display - no handset or addtional equipment required.

- Turn the jackpot on and off as required enabling sessional incentivisation.

- Ability to add and remove tables from participating in the jackpot via the display or management console.

GAME OPTIMISER
– FOR ROULETTE

GES GO is an optimisation and integrity system for monitoring roulette games.

Winning result data is collected from each wheel to check for bias or abnormality, A wireless dealer handset logs dealers on and off tables, measures table utilisation, cash game play and advises optimum spin rates.

GAME OPTIMISER
- DASHBOARD

The main dashboard gives an overview of all tables and wheels.

Table utilisation, game speed, wheel performance and dealer metrics can be viewed across the entire gaming floor.

GAME OPTIMISER
– WHEEL LOGGING

Roulette wheel location, maintenance and history events are all logged and displayed in the dashboard.

GAME OPTIMISER
– WHEEL BIAS CHARTS

A traffic light alert systems highlights bias issues with each roulette wheel and polar charts enable closer investigation of winning result frequency and statistics.

GAME OPTIMISER
– DEALER HANDSET

- Dealer logging to track performance.
- Prompts dealers when to spin up.
- Provides feedback on target spin rates.
- Measures players per game by colour chips and cash chip in play.
- Captures table pricing and marked up colour chips.

GES
LUCKY
BALL
ROULETTE

Lucky Ball is a simple and exciting side bet for the game of Roulette. Players place a separate wager on one of 4 coloured Luck Ball bets.

Each new game for "Lucky Ball" numbers are presented on the winning number display – one for each of the coloured bets. Each game, after No More Bets has occurred, one of the coloured bets will offer a bonus payout. The chance of each bet offering the bonus payout is exactly equal and the players must place their bets before the bonus payout selector triggers.

Players can bet on any number from one to four individual colour bets.

GES LUCKY BALL
BETTING AREA

Players place their bets on the individual colour betting areas. Players can choose one or any number of coloured bets

The payouts and Lucky Ball numbers are displayed on the winning number display

GES LUCKY BALL
GAME SEQUENCE

Players place their bets and after the ball is launched the lucky ball animation begins.

At a preconfigured time after the ball is launched four (4) unique numbers are generated, one for each of the coloured bets.

After "No More Bets" has been triggered, one of the bet reveals a Bonus Payout – in this case the Green bet.

GES LUCKY BALL
GAME SEQUENCE

If the winning number From the Roulette wheel matches on of the Coloured Lucky Balls – then it is a Winner – in this case the Yellow bet wins and pays 25 to 1.

In this example the Roulette Wheel Winning number is 8 and this matches The Red Lucky Ball bet.

As the Red Bet is in Bonus mode It pays 120 – 1.
