

Bravo 

## INDUSTRY SOLUTIONS

With the increasing popularity of table games, casino managers need both the ability to accurately track and compensate live play as well as the ability to effectively manage and analyze their table gaming operation.

Paltronics is an official distributor of industry-leading Bravo hardware and software solutions which offer casino personnel the essential management and tracking tools needed to stay profitable and competitive in today's casino environment.

Coupled with the latest integrated technology, including enhanced RFID and hybrid chip technology, the Bravo systems are recognized as the most comprehensive, innovative products available in the industry today.

## ADVANCED TRACKING & SECURITY

The Bravo table games system and product suite sets a new standard in managing table games while bolstering anti-money laundering efforts.

Thanks to its powerful vertical technology that delivers ultra-precise chip location identification and industry-leading chip stack height readings, its array of antennas identify and track play for players across all bets and bet spots—improving efficiency, convenience, tracking and security.

Advanced table antennas deliver a complete view of all activity across dealer work areas and player bet spots with the RFID chip tray acting as a “smart float” that seamlessly monitors chips from the moment they are issued to players until they are cashed in, regardless of the game type being played.

The system's intelligent information loop not only ensures transparency across financial transactions and chip movement, but also enables precise tracking of play and activity—forming an integral part of the Bravo table games system's interaction with tables, casino management systems, security and cage operations.

With this comprehensive solution, Bravo empowers casino operators to uphold the highest standards of tracking, security and compliance while delivering an exceptional gaming experience that is accurately monitored and rated.

**NEXT GENERATION RFID SOLUTIONS  
WITH HYBRID CHIP TECHNOLOGY**

# Bravo<sup>®</sup> ROULETTE

Bravo Roulette brings enhanced RFID and hybrid chip technology to the gaming floor. It delivers the ultimate in accuracy, performance and real-time insights to operators looking to increase efficiency, while providing a frictionless gaming experience.

An industry first, Bravo Roulette delivers power and precision with the ability to read 50+ chips in a single stack and tackles crowded chip placement and identification with ease.

## Key Features:

- Enhanced RFID with hybrid chip technology.
- Roulette chips with embedded RFID tag.
- Ability to accurately read 50+ chips in a single stack.
- Precise bet recognition with the ability to distinguish between all available betting positions - split, street, corner, line etc.
- Automatic Payout calculator based on winning bets in play.
- Roulette spin metrics showing bets in play, winning and losing bets etc. with detailed reporting.
- System-identified "late" bets.
- Connectivity to external information displays.

## Key Benefits:

- Increased table efficiency.
- Accurately rate players.
- Accurate and automated player payout calculations.
- Detailed tracking and analytics.
- System-identified "late" bets.
- Recovery from mismarks and rakes.

# Bravo<sup>®</sup> DICE

## Revolutionizing Craps with Enhanced RFID Technology

Bravo Dice takes Craps to an unprecedented level of precision, security, and player engagement through its innovative utilization of advanced RFID with hybrid chip technology.

Designed to transform the casino experience, Bravo Dice offers casino operators a seamless blend of enhanced intelligence and heightened security, all while preserving the authenticity of the player's interaction with the game.

At the core of Bravo Dice lies its cutting-edge RFID technology, which surpasses conventional methods by delivering unmatched accuracy even amidst chip crowding. This breakthrough eliminates the concerns of misread bets or unrecorded actions, ensuring every aspect of the game is accurately tracked and accounted for.

The system gathers data on every throw, bet placement, and result, providing operators with insights that were previously unattainable. This invaluable information empowers operators to optimize table layout, staff allocation, and game offerings, leading to more efficient operations and improved customer satisfaction.

Furthermore, the enhanced security features offer protection against fraud and discrepancies, creating an environment of trust for both players and operators alike.

# Bravo<sup>®</sup> PIT

Bravo Pit is the most complete table game management and player tracking system available on the market.

The system is designed to improve player ratings and pit management by utilizing the latest technology to enhance rating accuracy and evaluate operational efficiency.

Bravo Pit extends beyond standard electronic rating systems by capturing hand count and propositional bet data with our patented Chip & Card Detection (CCD) System and the use of enhanced RFID technology.

Accurate hand count and side bet capture and analysis allows a casino to better evaluate a player's true value, dealer efficiency and side bet assessment.

The integration of **Voucher In Voucher Out (VIVO)** technology, brings slot machine buy-in and cashout speed and efficiency to the table, increasing play and overall convenience.

Core Product Features:

- Enhanced RFID Technology.
- Voucher In Voucher Out (VIVO) System Integration.
- Electronic Rating Card.
- Dealer Input Unit.
- Ratings by Hand Counts.
- Table Utilization Analysis.
- Dealer Auditing & Development.
- Table Surveillance.

## BRAVO RFID BACCARAT

Bravo RFID Baccarat introduces a groundbreaking advancement in the world of casino gaming with its enhanced RFID technology tailored specifically for bet tracking in Baccarat.

This innovation ushers in an era of unparalleled accuracy, fortified security, and an uninterrupted player experience, revolutionizing the way bets are managed while maintaining the seamless charm of the game.

Designed to provide next-level bet tracking accuracy even in scenarios of chip crowding, Bravo RFID Baccarat eradicates the challenges associated with misread bets or overlooked wagers, establishing a flawless tracking system that captures every bet with extraordinary precision.

The RFID-enhanced betting system seamlessly interfaces with the casino's management system, generating near real-time data streams that bring a new level of sophistication and detail to table game management giving operators access to invaluable insights that were previously challenging to attain.

This wealth of information empowers operators to optimize their operations and allocate resources more efficiently, leading to an enhanced player experience and increased operational efficiency.

Additionally, the fortified security measures guard against potential discrepancies and security breaches, cultivating an environment of trust that benefits both players and operators alike.

## CAGE

### RFID Automated Chip Machine (ACM)

#### Transforming Chip Exchanges with RFID Technology

The Automated Chip Machine (ACM) stands as a revolutionary innovation poised to reshape the landscape of casino convenience and efficiency.

Seamlessly integrating the latest RFID technology, the ACM delivers an unparalleled self-service chip exchange experience for casino patrons, elevating convenience, security, and operational efficiency to unprecedented levels.

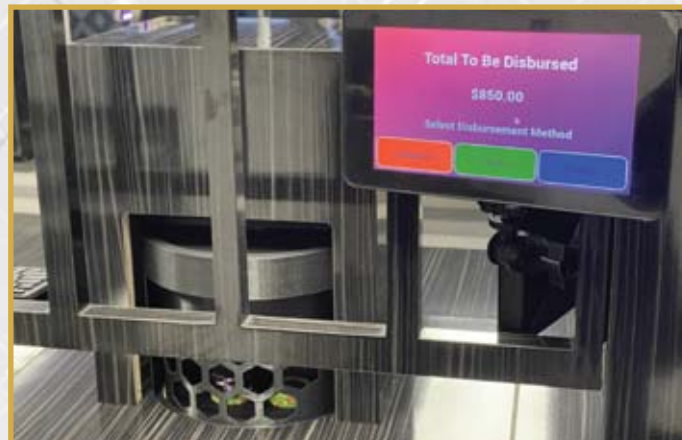

At the heart of the ACM's groundbreaking design is its advanced RFID technology, which sets it apart from conventional chip exchange methods. The ACM employs sensors to instantly detect and read the monetary value of the chips placed within its unit, ensuring an accurate and swift evaluation of chip values without requiring manual intervention, providing a seamless and user-friendly experience.

The ACM gives users the freedom to choose how they wish to redeem their chips. Once the chip values are read, patrons are presented with the option to exchange their RFID-enabled chips for either cash or a casino voucher, eliminating the need for patrons to queue at the cage window for chip exchanges.

For casino operators, the ACM introduces a game-changing solution that optimizes efficiency while fostering an environment of enhanced player engagement. By reducing the need for manual chip exchanges, the ACM frees up valuable staff resources and reduces waiting times, contributing to a smoother overall casino experience.

The option of dispensing casino vouchers encourages players to continue their gaming journey across the casino floor, effectively increasing revenue potential and encouraging prolonged engagement.

By bringing the convenience of ATM-like transactions to the realm of casino chip exchanges, the ACM eliminates barriers and enhances the convenience, security, and efficiency of chip redemption for both patrons and operators.

The Brain Behind  
Intelligent Table Games Operations

# Bravo<sup>®</sup> ANALYTICS

Bravo Analytics is the command center for intelligent table games operations, harnessing the power of AI, RFID and Table Sensor Technology. The platform delivers real-time, actionable insights that helps operators maximize efficiency and boost overall profitability.

Bravo Analytics gives operators detailed analysis and at-a-glance health checks by segment - table min, game type and side bets - improving operational decisions based on actual, casino-specific information analysis.

By communicating directly with the Bravo table game management system, Bravo Analytics captures and evaluates all table game information in the most comprehensive and efficient manner possible.

## Key Features:

- In-depth data analysis based on casino-specific performance.
- Table games occupancy analysis.
- Profit calculations - theoretical profit per player for each segment (table game type and bet limit) on the casino floor.
- Floor planning optimization to maximize profit.
- Easy-to-read dashboard displays.
- Heat map analysis.
- Executive Efficiency (EE) scoring.

## Key Benefits:

- Table yield management.
- Understand how specific games and side bets are performing.
- Trend analysis of efficiency.
- Identify optimal table occupancy levels.
- Optimize planning of your floor spread.
- Improve overall table efficiency.

Optimization

# Bravo<sup>®</sup> POKER

Bravo Poker delivers total poker room management, satisfying all aspects of operations, marketing and payments, in order to deliver accurate monitoring, tracking and managing of the entire poker room.

The system caters to poker operations of all sizes from small, local casinos all the way to large iconic poker rooms and major events such as the WSOP.

With online registration, casinos can further increase revenue and streamline tournament operations with advanced online booking functionality.

# Bravo® POKER LIVE

Bravo Poker Live is the leading live poker data app with over 420,000 active users nationwide.

Casino clients benefit from real-time data sharing with active poker players seeking live cash game and tournament information.

Key information delivered direct from the poker room to the players' mobile device include: Available Games, Waiting List Sign-Up, Online Tournament Registration, Live Tournament Clock and Promotion Specials.

In-app advertising is available to all Bravo customers looking to increase awareness and drive attendance for events and tournaments.

Advertising can be tailored to specific locations for targeted outreach, with detailed campaign performance reporting.

# Bravo<sup>®</sup> CAGE

The first of its kind, Bravo Cage & Bravo Balance deliver a cage management system from check-in to check-out, allowing operators to finally say goodbye to working across multiple management systems!

A complete solution that integrates with Bravo table game systems, Bravo Cage & Bravo Balance can be used to manage all transactions between the casino cage and the entire property.

With accuracy, efficiency and real-time data availability at the heart of the solution, as a fully digital offering, Bravo Cage & Bravo Balance deliver significant value and savings by eliminating the need for time consuming, paper-based tracking and messy filing.

# Bravo<sup>®</sup> BALANCE

Incorporating all elements required for Balancing, Credit and Collections, users can now operate all critical cage items at the touch of a button, all from one central system!

#### Key Features:

- Check in/out inventory.
- Summary/Accountability.
- Export summary to GL accounts.
- Credits/Debits customized.
- Even exchanges customized.
- Rolling chips.
- Customized reports.

# Bravo® CAGE LOGIX

Bravo Cage Logix, with its wide RFID reading area at cage windows, delivers increased accuracy and efficiency for chip redemption including outgoing and incoming fills and credits.

Bravo Cage Logix instantly reads the value and quantity of RFID enabled chips at the cage window, making inventory management, chip exchange and disbursement faster and more accurate than ever before!

The system can identify chips introduced from outside of the property and integrates with cage cash dispensers.

Bravo® EZ Marker takes electronic tracking and depositing to the next level, giving customers a mobile and secure way to issue markers from anywhere on the casino floor.

- Digital and mobile solution that eliminates the need for paper copies.
- Electronic signatures are captured securely with encryption to provide the highest level of security and universal acceptance.
- Connects and communicates directly with cage systems, giving casinos a seamless solution for logging and tracking all markers.

# TABLE GAMES THAT MAKE A DIFFERENCE

Genesis Gaming's table games development division regularly releases new titles designed to entice and engage today's player while delivering superior results to the operator.

From new games spanning blackjack, baccarat and carnival games, to innovative side bets enhanced by the advanced tracking solutions its Bravo Pit solution, Genesis Gaming helps operators get more from their casino floor.

Customers can select from cost-effective bundle packages as well as standalone options within the table games portfolio. Highly successful games and side bets include:

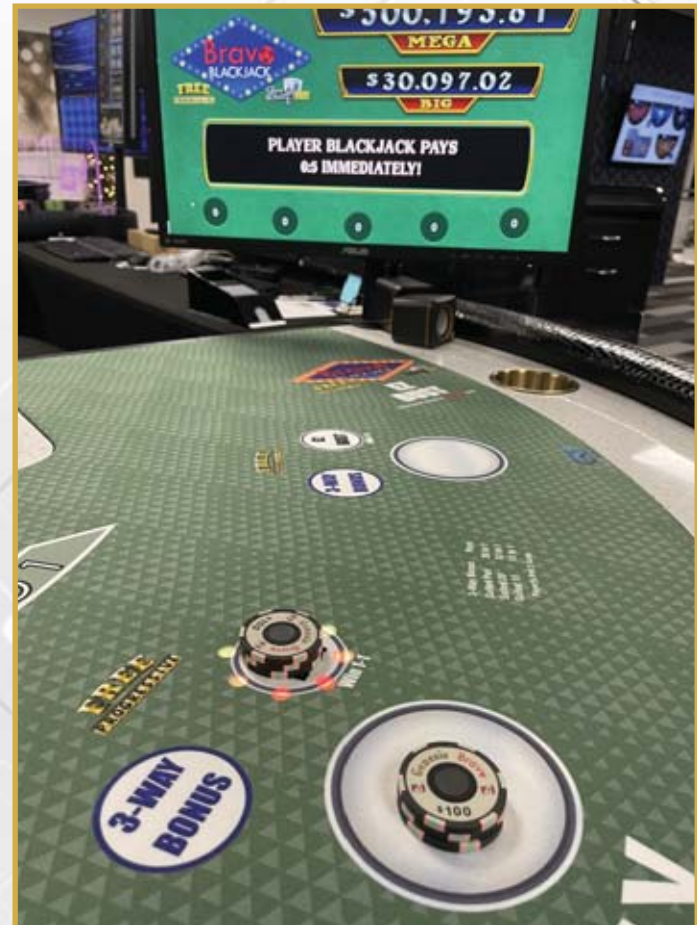

- EZ Bust (Side Bet)
- 3 for the Money
- Buddha's Bonus
- Dragon Pai Gow

# Bravo<sup>®</sup> BLACKJACK

Bravo Blackjack breaks the traditional table game mold, bringing a pioneering FREE PROGRESSIVE feature to the popular game.

Designed to bring the excitement of progressive enabled slots to Blackjack in a non-invasive fashion that doesn't slow play, Bravo Blackjack with FREE PROGRESSIVE is an enticing add-on for both the player and operator.

## Gaming Payments Made Easy

### Online & In-Person Credit/Debit Card Payments

CasinoPay™ has an impressive track record powering in-person debit card payments for some of the world's largest and most prestigious poker tournaments.

Seamlessly connecting with casino cage systems and the Bravo Poker system, CasinoPay gives operators and players a simple, secure and low-cost POS solution for card payments that maximizes efficiency and convenience.

### CasinoPay™ – Tableside Buy-Ins (PIN Debit)

The CasinoPay PIN Debit Card payment solution is secure, efficient and simple-to-use, resulting in fast transactions and a positive experience for operators and patrons. The solution allows players to conveniently pay for their gaming buy-ins while seated at the table using any valid debit card.

## The Future of Mobile Payments

PayFiniti brings the latest mobile wallet payment technology to the entertainment and gaming industries.

From online and social gaming to entertainment and casino-based transactions, PayFiniti bridges the gap and makes mobile payments easy and secure for both customers and operators.

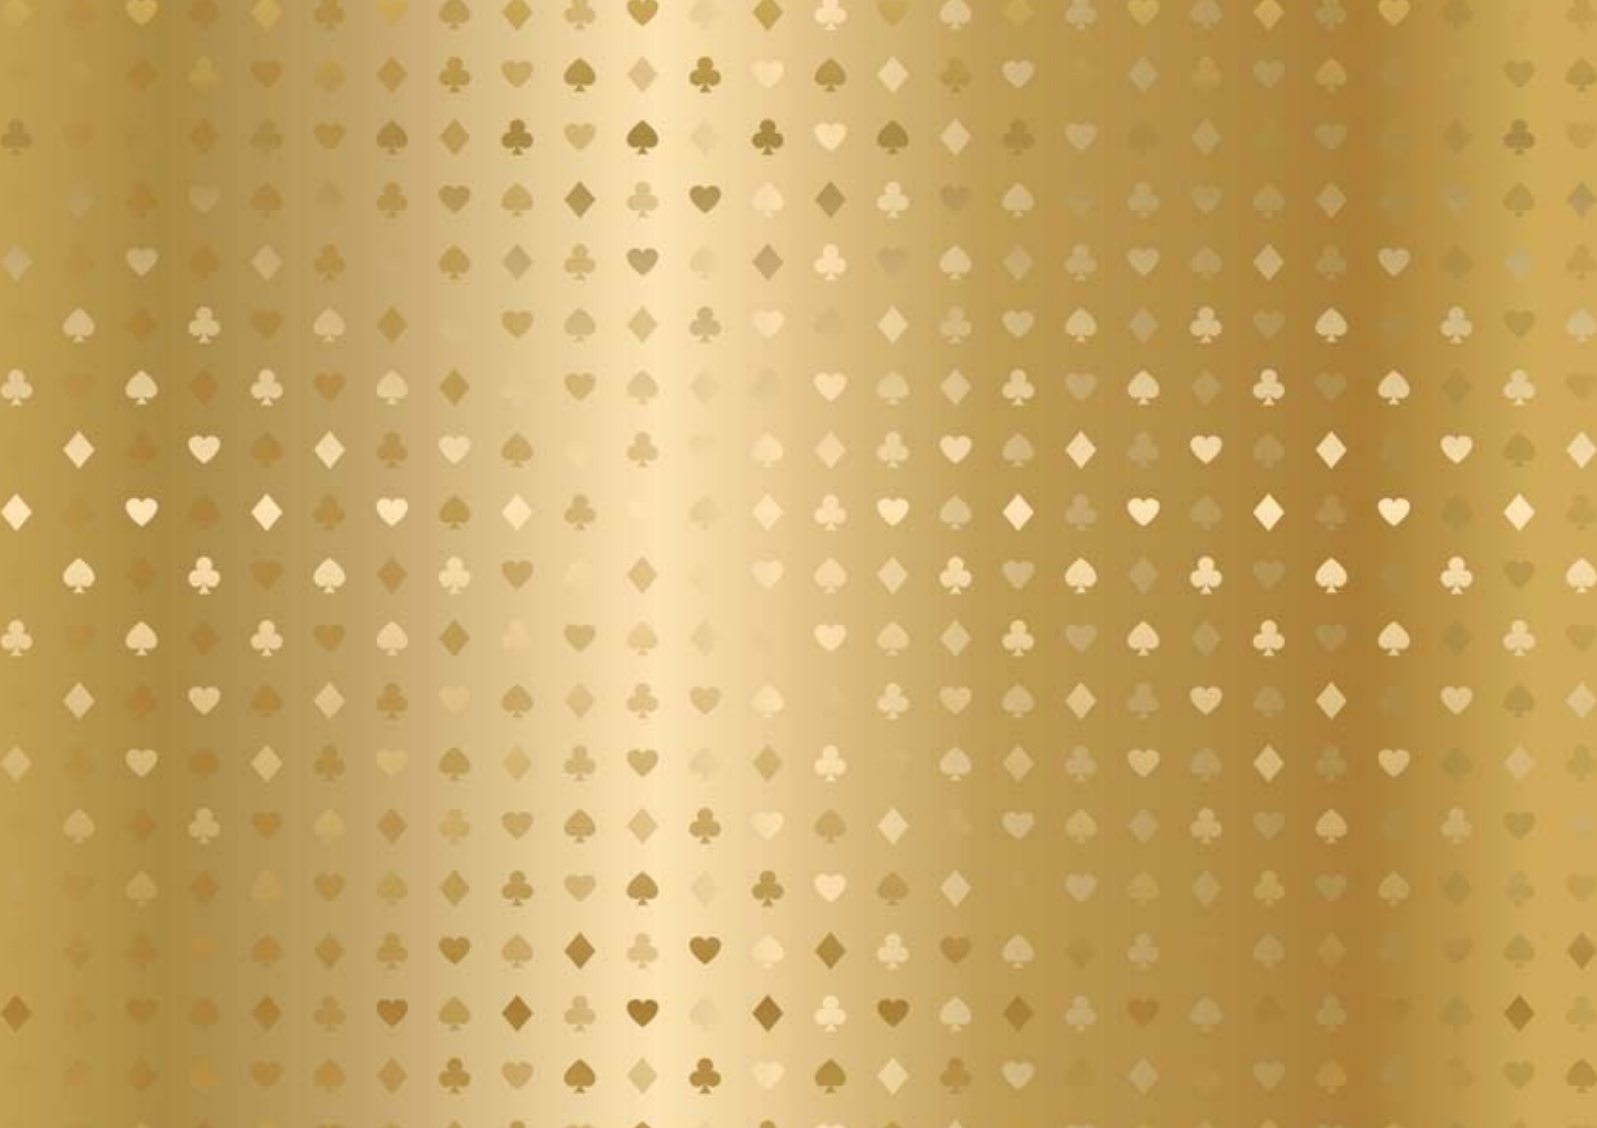

PayFiniti delivers payment flexibility, while increasing overall efficiency without compromising security.

Available for both iOS and Android devices, the PayFiniti Wallet brings complete cashless freedom to users, enabling operators to easily accept purchases in real-time.

Convenient, secure and simple to use, the master PayFiniti wallet account can be funded via the user's bank account, by wire transfer, debit/credit card, ACH and crypto currency. The wallet can be unloaded by initiating transfers using ACH, debit card and crypto currency.

Operator-specific accounts are set up within the app, or as part of the programs white-label offering, enabling the user to transfer funds across accounts for payments/transactions.
